DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

The closest prior art (US 6,745,384 to Biggerstaff) taken alone or in combination fails to teach, in combination with the other claimed limitations:

Determining at least one propagator for the current stage simplified programming element, the propagator being a form that is matched against terms of an appropriate stage and posting information about projections of one or more of the terms, and being described in the programming element, the propagator incrementing the value of the projections

as recited in independent claim 1 and similarly recited in independent claims 7 and 8.

Biggerstaff discloses 'at least one propagator for the current stage simplified programming element' (col. 6, lines 8-11 "transformation are triggered by the pattern of ... operators and operands") and 'posting information about projections of one or more of the terms' (col. 6, lines 13-14 'add property tag adornments ... that anticipated how those expressions might be implemented') but does not disclose or suggest such 'posted information' including an incremented value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
